Get your weekend back with . . . CALL DATA MANAGER

Call Data Manager is designed to deliver a high level of care and attention, freeing valuable time from back office functions.

Call Data Manager is a cloud based system, it works from any computer or tablet. All staff members can accurately and easily create quotations, book additional services and update treatments, tasks and payments directly from their device.

As a result of **Call Data Manager** enjoy:

- Improved customer communications;
- Reduction in costly rescheduled calls;
- Increased efficiencies in route planning;
- Improved customer satisfaction;
- Improved cash collection;
- Operators can complete quotes and book treatments with the customer;
- Targeted mailings have increased beneficial treatment orders;
- "add value" with van sales;
- Back office efficiencies in time and costs;
- Data enables us to analyse and continually improve our business model;
- An affordable system, paying only for what you use.

Can **Call Data Manager** help your business?
